## \* \* SUMMARY PARAGRAPHS EXPLAINING CLIENT'S ATTAINED SCALE SCORES \* \*

## TRUTHFULNESS SCALE: LOW RISK RANGE

RISK PERCENTILE:15

This youth's response pattern on the Truthfulness Scale is in the Low Risk (zero to 39th percentile) range. This is an accurate JSAP profile and other JSAP Scale scores are accurate. This individual responded to the JSAP test items in a non-defensive, cooperative and truthful manner. The Truthfulness Scale is designed to identify self-protective, recalcitrant and guarded youths who minimize or even conceal self-report information. Denial and distortion are minimal. This person has adequate reading skills and was truthful.

## ALCOHOL SCALE: PROBLEM RISK RANGE

RISK PERCENTILE:79

This juvenile's score on the Alcohol Scale is in the Problem Drinker (70 to 89th percentile) range. Either an established pattern of alcohol use and abuse is present, or this juvenile is a recovering (alcohol problem, but has stopped drinking) alcoholic. Alcohol use or abuse is likely a focal issue in this juvenile's adjustment problems. An alcohol (beer, wine or alcohol) or drinking-related problem is evident. RECOMMENDATIONS: Participation in alcohol-related counseling (individual, family or group), alcohol-related education classes and/or 12-Step community program involvement should be considered. Relapse is possible. If recovering, this individual should continue in counseling (individual or group) or Alcoholics Anonymous (AA). Family counseling should be encouraged. Reporting of treatment compliance and attendance throughout probation is desirable. With regard to alcohol, moderately intensive probation is recommended.

## DRUGS SCALE: MEDIUM RISK RANGE

RISK PERCENTILE:58

This troubled youth's score on the Drugs Scale is in the Medium Risk (40 to 69th percentile) range. Some indicators of drug use are present, yet an established pattern of drug abuse is not evident. RECOMMENDATIONS: Review of this youth's court history appears warranted and if additional drug-related offenses exist, probation and counseling or treatment recommendations should be upgraded accordingly. A fine might be imposed as a possible disposition. If other drug-related arrests exist consideration might be given to a week-end incarceration for the "shock" effect. Community service could incorporate attendance at Narcotics Anonymous (NA) or Cocaine Anonymous (CA) meetings. Credit might be given toward a fine disposition if classes and/or meetings are attended and completed as required. Wherever possible parental involvement should be encouraged. This youth may be in the early stages of drug involvement, consequently we are recommending prompt intervention. This is a medium risk Drug Scale score.

## AGGRESSIVENESS SCALE: PROBLEM RISK RANGE

RISK PERCENTILE:72

An aggressive problem is evident. Problem risk scorers can be expected to seek excitement and can be intimidating or threatening. Low frustration tolerance, disruptiveness, verbal abusiveness, impulsiveness and aggressive behavior are likely. This person could be disruptive and hostile. Aggressiveness can be exacerbated by frustration, perceived stress and/or substance (alcohol or other drugs) use or abuse.

STRESS COPING SCALE: MEDIUM RISK RANGE

RISK PERCENTILE:66

Although generally manifesting average stress coping abilities, this youth's emotions can interfere with judgment--particularly when frustrated, angered, rejected or during periods of substance abuse. Stress does not appear to be a focal issue in this youth's adjustment. This score is in the Medium Risk (40 to 69th percentile) range.

\* \* \* \* \*

SIGNIFICANT ITEMS: The following self-report responses represent topics that may help in understanding the youth's situation.

ALCOHOL

-----

16. States concerned about drinking

DRUGS

-----

8. Many friends use drugs

28. May or may not use drugs

AGGRESSIVENESS

-----

35. Youth's aggressiveness disliked

45. Needs to reduce aggressiveness

58. Energetic, restless, disruptive

MULTIPLE CHOICE ITEMS (JUVENILE'S SELF-REPORT)

-----

98. After drinking: vomit/nausea

108. Denies drug-related symptoms

99. After drinking:speech/walk prob

109. Infrequent drug user

100. Denies increased tolerance

110. No drug problem

101. States a social drinker

111. No drug help need

102. Drinking: mild problem

112. Rates drugs: no problem

103. Not sure if needs alcohol help

113. Aggressiveness rating:outgoing

104. Not a recovering person

114. Reports no family problems

105. Rates alcohol: some problems

115. Denies emotional problems

106. Occasional drug use

116. No need to see a counselor

107. Denies withdrawal symptoms
